

Compliant collection & recycling of solar panels, batteries & inverters

For UK solar & battery storage installers

THE PROBLEM

Decommissioned panels, lithium storage units and inverters pile up on site. Most installers have no licensed carrier that'll take lithium, and no clean paper trail if the Environment Agency asks.

WHAT WE DO

CellComply is an Environment Agency-registered upper-tier waste broker (CBDU640370). We arrange and fully document the collection and permitted treatment of your end-of-life kit. Physical uplift runs through our ADR-compliant carrier partner, so every hazardous movement travels with a consignment note and you keep the full audit trail.

WHAT WE TAKE (ALL CLASSED AS WEEE)

Solar panels

Lithium batteries & storage units

Inverters

HOW IT WORKS

1

Tell us what you've got: make, quantity, weight, storage and site.

2

We quote, priced by weight and volume.

3

Licensed collection from your site.

4

Permitted treatment, with the full duty-of-care paperwork sent to you.

WHY INSTALLERS TRUST US

- ✓ EA-registered upper-tier waste broker, **CBDU640370**, verifiable on the public register
- ✓ Professional indemnity insurance (Hiscox)
- ✓ Every carrier partner passes our 12-point duty-of-care vetting
- ✓ Full transfer notes & hazardous consignment notes on every collection
